DAVENPORT INSTITUTE

AN ANALYSIS OF K-12
EDUCATION EXPENDITURES
IN CALIFORNIA:

FY 2003–04 to FY 2008–09

(This page left intentionally blank)

INTRODUCTION

This report is one in an ongoing series of periodic analyses of public policy issues by the Davenport Institute. This report analyzes public, K-12 education expenditure patterns in California from fiscal year (FY) 2003-04 to FY 2008-09 (the most recent year for which comprehensive data are available).

The first section of this report looks at K-12 education expenditure patterns statewide. The second section analyzes special education demographics and expenditures. Section 3 compares the expenditure patterns of fifty-two selected school districts in California. Section 4 presents profiles for each of the fifty-two selected school districts.

Partial funding for this report was provided by the California Chamber of Commerce Educational Foundation.

The authors are solely responsible for the content of this report.

EXECUTIVE SUMMARY

Overview

This report examines K-12 public school district finances in California. The focus of this report is on how much money is spent by these public school districts and how that money has been allocated from Fiscal Year (FY) 2003-04 through FY 2008-09. There are four sections in this report. Section 1 analyzes total school district expenditures statewide. Section 2 analyzes expenditures for Special Education statewide. Section 3 analyzes the expenditure patterns of 52 selected California public school districts. Section 4 presents detailed expenditure profiles for 52 selected California public school districts.

Over the last several years, the expression “budget cuts” has been heard often regarding K-12 public school district expenditures in California. In reality, total expenditures (excluding Capital Expenditures) have increased every year from FY 2003-04 through FY 2007-08, before leveling off in FY 2008-09. (If Capital expenditures are included, the Total Expenditures have increased every Fiscal Year).

Total expenditures (excluding Capital Expenditures) increased from \$45,603,379,048 to \$55,601,177,318 during this period, an increase of 22%. To put this 22% increase in perspective, it was notably greater than the 15% increase in Per Capita Personal Income (PCPI) for all Californians during this period. It was also greater than the increase in inflation or the consumer price index during this period. (See Table 1-2, pp. 4-5 for a comparison of the increases in each of these indices) Throughout this report, expenditure increases are compared to the corresponding change in California PCPI. This is done for two reasons. First, PCPI gives the most precise measure of the ability of Californians to pay for all goods and services – everything from groceries, transportation, and housing to police protection, parks, and K-12 public education. Second, the change in PCPI during this period was greater than the change in the inflation. Therefore, comparing the changes in K-12 public school district expenditures to the change in PCPI puts the changes in K-12 school district expenditures in the best possible light, because while K-12 school expenditures grew faster than PCPI, K-12 school district expenditures grew even more rapidly compared to the inflation rate.

In addition, when comparing the changes in K-12 school district expenditures to the changes in PCPI in the Section I of this report, PCPI growth was set at zero for the last year analyzed (FY08-09). In reality, PCPI actually declined that year, but here again a choice was made to put the changes in K-12 school district in the best possible light. Note, however, that in Section IV, which examines 52 selected school districts in more detail, a graph showing the percentage growth in district Total Expenditures (excluding Capital Expenditures) compared to the growth (or in the last year, decline) in PCPI for each year is provided. Nevertheless, all calculations for any annual savings associated with reducing annual expenditure growth to the same rate as PCPI in FY 08-09 are based on a PCPI growth rate of zero, in order to present the changes in K-12 school district expenditures in the best possible light, and to avoid potential confusion on the part of readers who might be somewhat unfamiliar with the economic concept of “negative growth”.

In every year examined, except for FY 08-09 total expenditures for K-12 public education increased, but even in FY 08-09 many expenditure categories increased significantly. Section 1 analyzes these changes in each category of expenditure (and calculates savings etc.)

Average Daily Attendance (ADA) actually declined from 5,808,658 in FY03-04, to 5,630,222 in FY 08-09. During this period, Total Expenditures per student (excluding Capital Expenditures) increased from \$7,851 in FY 03-04 to \$9,876 in FY 07-08, before declining by one dollar, to \$9,875, in FY 08-09. This was an increase of 25.8% in Total Expenditures per student from FY 03-04 through FY 08-09. This 25.8% increase was substantially greater than the 15 percent increase in California PCPI over this same period. When Capital Expenditures are included, Total Expenditures per student increased from \$9,799 in FY03-04 to \$12,134 in FY 08-09, an increase of 23.8%.

Special education, analyzed in Section 2, receives attention because it constitutes a significant portion of K-12 Total Expenditures and because it is useful to understand the scope of special education expenditures and the nature of services involved. The total Full Time Equivalent (FTE) Special Education ADA statewide remained fairly constant at approximately 3% of Total statewide ADA, from FY 03-04 (182,822 ADA) to FY 08-09 (183,032 ADA). (See Table 2-1, pp. 82-83) The total number of children receiving at least some sort of special education attention also remained fairly constant from FY 03-04 (678,105) to FY 08-09 (681,980). Most of these children received some special attention each week addressing a speech or language impairment, or a specific learning disability regarding, for example, mathematics or reading. (See Table 2-2, pp. 86-87)

Because there is frequently much discussion about how much money actually “goes directly to classroom education” this issue is addressed at the end of Section 1. Direct classroom expenditures are commonly understood to include teacher salary and benefits, instructional aide salary and benefits, and classroom textbooks, materials, and supplies. In this analysis the specific expenditure categories used to calculate what constitutes direct classroom expenditures are:

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Using these categories, direct classroom expenditures statewide went from 59 percent of Total Expenditures (excluding Capital Expenditures) in FY 03-04 to 57.8 percent of Total Expenditures (excluding Capital Expenditures) in FY 08-09. It should be kept in mind, however, that there is a wide range among the 52 selected school districts analyzed in Sections 3 and 4 in the percentage of Total Expenditures (excluding Capital Expenditures) allocated to direct classroom expenditures. In FY 08-09, for example, four of the 52 districts allocated more than 65 percent of their Total Expenditures to direct classroom expenditures (Temecula Valley Unified 70.4%, Corona-Norco Unified 69.2%, Fremont Unified 67.7%, and Chino Valley Unified 65.5%) while six of the 52 districts allocated less than 50 percent of their Total Expenditures to direct classroom expenditures (Clovis Unified 48.9%, Bakersfield City Elementary 48.8%, Oakland Unified 48.6%, Fresno Unified 47.9%, San Francisco Unified 43.4%, and Monterey Peninsula Unified 43.3%).

A brief note regarding the state’s accounting system:

Readers of this report will notice that two methodological issues involving the state's accounting system, Standardized Account Code Structure (SACS), had to be addressed in the course of this analysis.

First, benefit expenditures for all credentialed personnel, teacher and administrator alike, are lumped together. The benefit expenditures for teachers and the benefit expenditures for other credentialed personnel should be separately designated as such.

Second, clearly separating capital debt payments and debt payments for pension obligation bonds would allow a more precise evaluation of the actual cost related to salary and benefit expenditures.

These two improvements would allow parents and taxpayers to have a clearer, more precise picture of public school finances in California.

Section 1: Statewide Summary Data

1. Statewide expenditures for Teacher Salaries and Benefits declined from 50% of Total Statewide expenditures (excluding capital expenditures) in FY 03-04 to 49% in FY 05-06, and declined further to 48% in FY08-09. In other words, by FY 05-06, less than half of the K-12 operating expenditures statewide were for teacher salaries and benefits. (See Table 1-8, pp. 16-17)
2. Statewide, Average Daily Attendance (ADA) decreased from 5,808,658 in FY 03-04, to 5,630,222 in FY 08-09. (See Table 1-1, pp. 2-3)
3. Statewide, per student expenditures for 22 out of 26 operating expenditure categories increased at a faster rate from FY 03-04 to FY 08-09 than Per Capita Personal Income (PCPI) in California, which increased 15% during the same period. Notably, per student expenditures for Classified Supervisors' and Administrators' (those not holding a teaching credential) salaries increased 44%, per student expenditures for Certificated Supervisors' and Administrators' (those holding a teaching credential) increased 28%, and per student expenditures for staff travel and conference attendance increased 22%, from FY03-04 to FY 08-09. By way of comparison, per student expenditures for Certificated Teachers' Salaries increased 21% during this same period. (See Table 1-9B, pp. 20-21).
4. In FY 07-08, holding the increase in Total Expenditures per student, except expenditures for Teacher Salaries and Benefits and Capital Expenditures, to the same increase as the PCPI would have freed up well over \$1.8 billion, enough money to employ an additional 22,076 teachers. To put that in perspective, there are approximately 300,361 FTE teachers employed statewide. In FY 08-09, holding the increase in each operating category of spending per student (e.g. Certified Supervisors and Administrators, Travel and Conferences, etc. – see # 3 above) would have freed up well over \$862 million, enough to employ an additional 10,302 teachers statewide. (See Tables 1-4A and 1-4B, pp. 7-8)
5. Statewide, Total Expenditures per student (excluding capital expenditures) increased from \$7,851 in FY03-04 to \$9,876 in FY 07-08, before declining by one dollar, to \$9,875 in FY 08-09. This was an increase of 25.8% in Total Expenditures per student from FY 03-04 through FY 08-09. This 25.8% increase was substantially greater than the 15% increase in California PCPI over this same period. What this means is that, although Total Expenditures per student increased much

faster than California PCPI, relatively less of this increased revenue per student has been going to Teacher Salaries and Benefits (see #1 above) and relatively more has been going to other expenditures, notably Administrator salaries and benefits. (See Table 1-5, pp. 10-11)

6. Statewide, Total Expenditures, including Capital Expenditures, per student increased from \$9,799 in FY 03-04 to \$12,134 in FY 08-09. (See Table 1-38, pp. 78-79)
7. Direct “In the Classroom” expenditures statewide went from 59 percent of Total Expenditures (excluding Capital Expenditures) in FY 03-04 to 57.8 percent of Total Expenditures (excluding Capital Expenditures) in FY 08-09. (See Table 1-39, pp. 80-81)

Section 2: Special Education

8. The total Full Time Equivalent (FTE) Special Education ADA statewide remained fairly constant at approximately 3% of Total statewide ADA, from FY 03-04 (182,822 ADA) to FY 08-09 (183,032 ADA). (See Table 2-1, pp. 82-83). The total number of children receiving at least some sort of special education attention also remained fairly constant from FY 03-04 (678,105) to FY 08-09 (681,980). Most of these children received some special attention each week addressing a speech or language impairment, or a specific learning disability regarding, for example, mathematics or reading. (See Table 2-2, pp. 86-87)

Section 3: 52 Selected School Districts Comparisons

9. Total Expenditures (excluding Capital Expenditures) per student varied substantially among the 52 school districts profiled in Section 3. In FY 08-09, for Los Angeles Unified Total Expenditures per student (excluding Capital Expenditures) were \$13,732, and for Oakland Unified Total Expenditures per student (excluding Capital Expenditures) were \$12,946. By way of comparison in FY 08-09 Total Expenditures per student for Temecula Valley Unified were \$7,665 and for Corona –Norco Unified \$7,588. (See Table 3-1, pp. 94-97)
10. Estimated Teacher Salaries and Benefits as a percentage of Total Expenditures (excluding capital expenditures) also varied significantly among the 52 school districts profiled in Section 3. For example, in FY 08-09 Los Angeles Unified spent approximately 41% of its Total Operating Expenditures on Teacher Salaries and Benefits, and Oakland Unified spent approximately 35%. By way of comparison, Corona-Norco Unified spent approximately 62% of Total Expenditures (excluding capital expenditures), and Fremont Unified spent approximately 59% of Total Expenditures (excluding capital expenditures) on Estimated Teacher Salaries and Benefits. (See Table 3-2, pp. 98-101)
11. The percentage change in Total Expenditures per student (excluding capital spending), between FY 03-04 and FY 08-09 differed noticeably among the 52 districts reviewed in Section 3. For example, Compton Unified increased its Total Expenditures per student (excluding capital spending) by 62% during this time period, which is approximately four times the rate of growth in statewide per capita personal income (PCPI). Similarly, Monterey Peninsula Unified increased its total expenditures per student by 55%, which is approximately 3.6 times the rate of increase in statewide PCPI during the time period examined. (See Table 3-3, pp. 102-105)

12. Of the 52 districts examined in Section 3, Certificated and Classified Administrator/Supervisor Salaries as a percentage of Certificated Teacher Salaries ranged between 12% and 16% for the majority (34 districts). Some districts, however, were outside of this range, with some spending relatively less on Administrator/Supervisor Salaries, such as Santa Ana Unified where Administrator/Supervisor Salaries represented only 9% of Certificated Teacher Salaries, expenditures, and some spending relatively more, such as Oakland Unified, where Administrator/Supervisor Salaries expenditures represented 24% of the Certificated Teacher Salaries expenditures. (See Table 3-4, pp. 106-109)
13. There is a wide range among the 52 selected school districts analyzed in Sections 3 and 4 in the percentage of Total Expenditures (excluding Capital Expenditures) allocated to direct classroom expenditures. In FY 08-09, for example, four of the 52 districts allocated more than 65 percent of their Total Expenditures to direct classroom expenditures (Temecula Valley Unified 70.4%, Corona-Norco Unified 69.2%, Fremont Unified 67.7%, and Chino Valley Unified 65.5%) while six of the 52 districts allocated less than 50 percent of their Total Expenditures to direct classroom expenditures (Clovis Unified 48.9%, Bakersfield City Elementary 48.8%, Oakland Unified 48.6%, Fresno Unified 47.9%, San Francisco Unified 43.4%, and Monterey Peninsula Unified 43.3%). (See Table 3-5, pp. 110-113)

METHODOLOGY

The data utilized in this report were obtained from several sources. The data about California Per Capita Personal Income (PCPI) were obtained from the United States Bureau of Economic Analysis, and the data source for rates of change to the Consumer Price Index and Gross Domestic Product was the Economic Research Unit of the Federal Reserve Bank of St. Louis. All school expenditure data came from two sets of data provided by the California Department of Education: the Standardized Account Code Structure (SACS) files and the J-90 Certificated Salary and Benefit files.

All school expenditures data were rinsed in the following fashion in order to remove data that do not pertain to K-12 Operating costs:

- Function codes 5000-5900 were removed to exclude Community/Civic Service-related expenditures
- Goal codes 4110, 4610-4630, 8100, ADLT, and CAFE were removed to exclude Adult Education, Community Service, and Cafeteria-related costs.
- Fund codes 11, 13, 61, and 95 were removed to exclude Adult Education, Student Body Fund, and Cafeteria-related costs.

Unless otherwise noted in the report, all individual objects of expenditure and totals exclude capital-related spending. In order to exclude this information, the following Funds were excluded:

- 14: Deferred Maintenance Fund
- 21: Building Fund
- 25: Capital Facilities Fund

- 30: State School Building Lease-Purchase Fund
- 35: County School Facilities Fund
- 40: Special Reserve Fund for Capital Outlay
- 49: Capital Project Fund for Blended Component Units

The statewide sections of this report do not include Local Education Agencies (LEAs) that are of either Joint-Powers Authorities (JPAs) or County Offices of Education (COEs). Expenditures for charter schools were included if the district reported those expenditures according to the SACS methodology.

Additionally, for the purposes of calculating Total Expenditures, specific objects of expenditure were excluded to again ensure that the data reflected operating costs, not capital-related costs or inter-fund expenditures. These expenditure objects are as follows: 7611-7651, 7299-7380, 7280, and 5710-5750. It should be noted that all debt-service related expenditures (7432-7434 and 7438-7439) were removed in order to ensure that no capital-related costs were included; however, it is likely that there are multiple debt obligations outstanding that have little or nothing to do with capital-spending, such as pension obligation bonds. In this regard, the total operating expenditures included herein are conservative estimates. It should also be noted that for the statewide totals, inter-district expenditures were also excluded in order to prevent double-counting; these objects include: 7281, 7221, 7211, and 7141.

With respect to Certificated Teacher Benefits, benefit costs are not reported by the California Department of Education for certificated teachers alone, but rather for all certificated staff combined. Thus, a benefit multiplier (Total Certificated Benefits as a % of Total Certificated Salaries) was developed and applied in order to estimate Certificated Teacher Salary and Benefit Costs. This most likely results in a slight overstatement of the expenditures for teacher benefits, because Certificated Supervisors and Administrators almost certainly have more expensive benefits.

In order to estimate the percentage of expenditures being spent “In the Classroom,” the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

SECTION 1: STATEWIDE SUMMARY DATA

Table 1-1 and Chart 1-1 show data about Average Daily Attendance (ADA) in K-12 public schools in California from Fiscal Year (FY) 03-04 through FY 08-09. Note that there was a slight decrease in the ADA during this period, from 5,808,658 in FY 03-04 to 5,630,222 in FY 08-09. Note also that a non-zero y-axis was used (in Chart 1-1) to display detailed clarity.

TABLE 1-1: Statewide Average Daily Attendance, FY 03-04 to FY 08-09

Fiscal Year	Average Daily Attendance (ADA)
FY 03-04	5,808,658
FY 04-05	5,810,058
FY 05-06	5,700,463
FY 06-07	5,744,828
FY 07-08	5,724,487
FY 08-09	5,630,222

CHART 1-1: Statewide Average Daily Attendance, FY 03-04 to FY 08-09

Table 1-2 and Chart 1-2 show data about changes in per capita personal income (PCPI) in California, changes in the gross domestic product (GDP) of the United States, and changes in the consumer price index (CPI) of the United States from FY 04-05 through FY 08-09. Note that the change in PCPI for California substantially exceeded the other two indexes in FY 04-05, FY 05-06, and FY06-07. In FY07-08 the U.S. GDP and the U.S. CPI both increased more rapidly than PCPI in California. In FY 08-09 PCPI in California declined, as did the U.S. CPI (although not as steeply as PCPI in California) while the U.S. GDP continued to increase. These indexes are based on the calendar year. So, for example, the three indexes listed for FY 04-05 are based on the changes that occurred from January 04 through January 05. As such, they reflect their respective values as of January 05, which is the midpoint of the 04-05 Fiscal Year, and therefore are an appropriate gauge by which to evaluate the expenditures for that Fiscal Year.

These data offer some perspective on the relative health of the California economy compared to the overall U. S. economy during this period. In this report K-12 education expenditures are compared to the PCPI in California. This is done because the PCPI in California is the most precise measure of the economic well being of Californians, and also it is the most precise measure of the income Californians have available to pay for food, clothing, shelter, transportation and many other goods and services, including K-12 public education. Cumulatively from FY 03-04 to FY 08-09, the increase in PCPI and U.S. GDP were both at approximately 14.7%, while the increase in U.S. CPI was approximately 13.8%.

TABLE 1-2: % Changes in PCPI, GDP, and CPI, FY 04-05 to FY 08-09

Fiscal Year	% Change in CA PCPI	% Change in U.S. GDP	% Change in U.S. CPI
FY 04-05	5.0%	3.28%	2.84%
FY 05-06	7.2%	3.35%	3.97%
FY 06-07	4.4%	3.17%	2.09%
FY 07-08	1.0%	2.11%	4.35%
FY 08-09	-3.5%	2.01%	-0.13%

Table 1-3 and Chart 1-3 show K-12 public school district Total Expenditures in California, excluding Capital Expenditures, from FY 03-04 through FY 08-09. This represents a 21.9 percent change over this period, which is substantially greater than the corresponding 15 percent change in California PCPI. As noted elsewhere in this report, the per student expenditures increased by 25.8 percent, an even larger amount.

TABLE 1-3: Statewide Total Expenditures, Excluding Capital, FY 03-04 to FY 08-09

Fiscal Year	Total Expenditures (excl. Capital)
FY 03-04	\$45,603,379,048
FY 04-05	\$47,510,716,420
FY 05-06	\$50,176,289,609
FY 06-07	\$53,465,071,010
FY 07-08	\$56,533,557,037
FY 08-09	\$55,601,177,318

CHART 1-3: Statewide Total Expenditures, Excluding Capital, FY 03-04 to FY 08-09

Table 1-4A shows potential savings from restricting growth in Total Expenditures (excluding capital and teacher salaries & benefits, and debt payments) per student to the percent change in PCPI from FY 07-08 to FY 08-09. Holding total expenditures, excepting expenditures for teacher salaries and benefits and capital expenditures, to the same increase as the PCPI in FY 07-08 would have freed up well over \$1.8 billion, enough money to employ an additional 22,076 teachers. To put this in perspective there were 300,361 FTE teachers statewide in FY 08-09.

Table 1-4B is a slightly more granular method for calculating savings in that each object of expenditure was restricted to growth in PCPI, rather than just total expenditure per student, as was the case in Table 1-4A.

TABLE 1-4A: Potential Savings from PCPI Growth Restriction: Total Expenditures per Student, FY 07-08 and FY 08-09

Fiscal Year	Total Expenditures (excl. capital and teacher sal&benefits)-Savings	Add'l Teachers
FY 07-08	\$1,815,940,301	22,076
FY 08-09	\$0	-

TABLE 1-4B: Sum of Potential Savings from PCPI Growth Restriction: All Expenditure Objects FY 07-08 and FY 08-09

Fiscal Year	Sum of Savings (excl. capital, teacher sal& benefits)	Add'l Teachers
FY 07-08	\$2,203,762,796	26,790
FY 08-09	\$862,734,833	10,302

Table 1-5 and Chart 1-5 show state wide K-12 public school district Total Expenditures per student, excluding Capital Expenditures, from FY 03-04 through FY 08-09. Total expenditures per student increased from \$7,851 in FY 03-04, to \$9,875 in FY 08-09, an increase of 25.8%. This 25.8 % increase was substantially greater than the 15% increase in California PCPI over this same period.

TABLE 1-5: Statewide Total Expenditures per Student, excluding capital, FY 03-04 to FY 08-09

Fiscal Year	Total Expenditures
FY 03-04	\$7,851
FY 04-05	\$8,177
FY 05-06	\$8,802
FY 06-07	\$9,307
FY 07-08	\$9,876
FY 08-09	\$9,875

CHART 1-5: Statewide Total Expenditures per Student, excluding capital, FY 03-04 to FY 08-09

Table 1-6 and Chart 1-6 show expenditures for K-12 public school teacher salaries in California from FY 2003-04 through FY 2008-09. These expenditures increased from \$18,278,186,189 in FY 03-04 to \$ 21,403,302,688 in FY 08-09. Note that these are teacher salaries only, not salaries and benefits.

TABLE 1-6: Statewide Teacher Salaries Expenditures, FY 03-04 to FY 08-09

Fiscal Year	Certificated Teacher Salaries
FY 03-04	\$18,278,186,189
FY 04-05	\$18,675,762,680
FY 05-06	\$19,342,200,463
FY 06-07	\$20,610,332,056
FY 07-08	\$21,460,730,791
FY 08-09	\$21,403,302,688

CHART 1-6: Statewide Teacher Salaries Expenditures, FY 03-04 to FY 08-09

Table 1-7 and Chart 1-7 show the statewide calculated expenditures for teacher salaries per student from FY 03-04 through FY 08-09. The table at the bottom of the facing page shows the savings and the number of teachers that could have been employed had these expenditures in FY 07-08 increased as much as PCPI and been held flat from in FY 08-09.

TABLE 1-7: Statewide Teacher Salaries Expenditures per Student, FY 03-04 to FY 08-09

Fiscal Year	Certificated Teacher Salaries
FY 03-04	\$3,147
FY 04-05	\$3,214
FY 05-06	\$3,393
FY 06-07	\$3,588
FY 07-08	\$3,749
FY 08-09	\$3,802

CHART 1-7: Statewide Teacher Salaries Expenditures per Student, FY 03-04 to FY 08-09

Fiscal Year	Certificated Teacher Salaries-Savings	Add'l Teachers
FY 07-08	\$710,442,505	8,637
FY 08-09	\$295,964,400	3,534

Table 1-8 and Chart 1-8 show the Estimated Teacher and Salaries and Benefits Expenditures as a percentage of Total Expenditures, excluding Capital Expenditures, from FY 03-04 through FY 08-09. Note that this percentage has declined somewhat from 50% in FY 03-04 to 48% in FY 08-09.

It should also be noted that expenditures for teachers benefits used in this Table were calculated in the following manner: Total Certified Salaries and Total Certified Benefit expenditures statewide are available. These two Total expenditure categories were then utilized to compute an average percentage ratio between salary expenditures and benefit expenditures for all Certificated personnel statewide. This percentage relationship was then applied to the available Total Salary expenditure for teachers to generate an estimated Teachers Salaries and Benefits expenditure. This calculation was made for each of the Fiscal Years shown in Table 1-8. In all probability, the estimated teachers Total Salaries and Benefits expenditure utilized here overstates the actual amount expended. This is because the benefit packages for more senior Certificated personnel in administrative positions, such as principals and superintendents, are typically much more lavish than those granted to classroom teachers. So, the actual percentage of Total expenditures allocated to Teacher Salaries and Benefits is probably lower than shown in Table 1-8.

TABLE 1-8: Statewide Estimated Teacher Salaries and Benefit Expenditures as a % of Total Expenditures, Excluding Capital, FY 03-04 to FY 08-09

Fiscal Year	Total Teacher Salaries & Benefits (est.) as a % of Total Expenditures
FY 03-04	50%
FY 04-05	50%
FY 05-06	49%
FY 06-07	49%
FY 07-08	48%
FY 08-09	48%

CHART 1-8: Statewide Estimated Teacher Salaries and Benefit Expenditures as a % of Total Expenditures, Excluding Capital, FY 03-04 to FY 08-09

Table 1-9A shows the percent changes in a variety of expenditures per student, between FY 03-04 and FY 08-09, compared to the percent change in California Per Capita Personal Income (PCPI) for the same period. In this table, capital-related expenditures were excluded. The first column lists the category of expenditure (Expenditure Object), while the second column shows the percentage change in each respective category of expenditure from FY 03-04 through FY 08-09. The third column simply shows the percentage change in the California PCPI (Per Capita Personal Income) over the same period. The right hand column shows the difference between the percentage change in the particular expenditure category and the percentage change in the PCPI over this same period. So, for example, expenditures for Certificated Teachers Salaries increased 21% from FY 03-04 through FY 08-09, while the corresponding change in PCPI was only 15%, with the difference of 6% shown in the right hand column. Note that all but four categories of expenditure increased more rapidly than PCPI during this period. The following Table (Table 1-9B) shows this data rank ordered by the size of the differential shown in the right hand column.

TABLE 1-9A: % Change in Various Expenditures per Student vs. % Change in PCPI, FY 03-04 to FY 08-09

Expenditure Object	% Change, FY 03-04 to FY 08-09	% Change in PCPI, FY 03-04 to FY 08-09	Differential
Certificated Teachers' Salaries	21%	15%	6%
Certificated Pupil Support Salaries	42%	15%	27%
Certificated Supervisors' and Administrators' Salaries	28%	15%	13%
Other Certificated Salaries	29%	15%	14%
Classified Instructional Salaries	31%	15%	16%
Classified Support Salaries	25%	15%	10%
Classified Supervisors' and Administrators' Salaries	44%	15%	29%
Clerical, Technical, and Office Staff Salaries	23%	15%	8%
Other Classified Salaries	34%	15%	19%
Approved Textbooks and Core Curricula Materials	35%	15%	20%
Books and Other Reference Materials	-48%	15%	-63%
Materials and Supplies	5%	15%	-10%

Total Certificated Benefits	27%	15%	12%
Total Classified Benefits	29%	15%	14%
Total Certificated Salaries	23%	15%	8%
Total Classified Salaries	28%	15%	13%

Table 1-9B shows the rates of change for the same objects of expenditure as in Table 1-9A; however, they are rank ordered by the size of the differential shown in the right hand column. So, for example, the first expenditure category listed “Other Insurance” increased 54% from FY 03-04 to FY 08-09, while the corresponding increase in California PCPI was only 15% over this same period. The right hand column (“Differential”) shows the difference (39%) between these two percentage increases over this same period.

Note that all but four categories of expenditure increased more rapidly than California PCPI during this period. Only expenditures for Materials and Supplies, Noncapitalized Equipment, Pupil Insurance, and Books and Other Reference Materials did not increase as rapidly as California PCPI during this period. Materials and Supplies increased 5%, while expenditures for Noncapitalized Equipment (minus 2%) Pupil Insurance (minus 12%) and Books and Other Reference Materials (minus 48%) actually decreased.

TABLE 1-9B: % Change in Various Expenditures per Student vs. % Change in PCPI, FY 03-04 to FY 08-09

Table 1-10A and Table 1-10B show the growth in Administrator/Supervisor salaries per student, relative to the growth in Teacher Salaries per student.

Table 1-10A shows the percentage change in expenditures per student for Certificated Supervisors and Administrators Salaries compared to the corresponding percentage change in expenditures per student for Teacher Salaries for every Fiscal Year from FY 03-04 through FY08-09.

In almost every year, Administrator/Supervisor salaries per student grew faster than Teacher Salaries per student. Thus, had Administrator/Supervisor salaries been restricted to the growth in Teacher Salaries, substantial savings would have been realized. This savings calculation is shown for each individual year, as well as for the entire six-year time frame (i.e. overall growth between FY 03-04 and FY 08-09).

TABLE 1-10A: % Change in Cert. Sup/Admin. Salaries per Student vs. % Change in Teacher Salaries per Student, FY 03-04 to FY 08-09

FY 07-08	\$106	8.8%	4.5%	\$23,717,348
FY 08-09	\$108	2.1%	1.4%	\$4,099,161
OVERALL (b/w FY 03-04 and FY 08-09)		44.3%	20.8%	\$98,898,798

Table 1-11 and Chart 1-11 show expenditures for certificated pupil support salaries from FY 03-04 through FY 08-09. Pupil support salaries are defined as salaries of all certificated personnel performing services of librarian, social worker, or certificated personnel doing pupil personnel work; psychologists and psychometrists; counselors, as well as health services rendered by physicians, oculists, dentists, dental hygienists, nurses optometrists, school audiometrists, psychiatrists, otologists, and other personnel as authorized in the field of physical and mental health. These expenditures increased from \$1,086,060,290 in FY03-04 to \$1,491,579,488 in FY 08-09.

As shown on the table at the bottom of the page, the calculated savings in Total Certificated Pupil Support Salaries Expenditures achieved by restricting year-over-year growth to the change in PCPI of Californians would have been \$149,152,004. Because PCPI growth was negative for FY 08-09, the per student expenditure for that year was simply held constant to calculate the estimated savings of \$27,543,841. Applying these savings to hiring more teachers would have resulted in 329 additional teachers being employed just in FY 08-09. Keeping the increase in these expenditures at the same rate as the increase in California PCPI would have afforded the employment of \$1,813 teachers.

TABLE 1-11: Statewide Certificated Pupil Support Salaries Expenditures, FY 03-04 to FY 08-09

Fiscal Year	Certificated Pupil Support Salaries
FY 03-04	\$1,086,060,290
FY 04-05	\$1,119,814,384
FY 05-06	\$1,171,105,658
FY 06-07	\$1,330,361,526
FY 07-08	\$1,488,547,464
FY 08-09	\$1,491,579,488

CHART 1-11: Statewide Certificated Pupil Support Salaries Expenditures, FY 03-04 to FY 08-09

Table 1-12 and Chart 1-12 on the following page show Statewide Certificated Pupil Support Salaries Expenditures on a per student basis for the time period examined, FY 03-04 to FY 08-09. The table at the bottom of the facing page shows the savings and the number of teachers that could have been employed had these expenditures in FY 07-08 increased as much as PCPI and been held flat from in FY 08-09.

Table 1-37 and Chart 1-37 show Total Expenditures, including Capital Expenditures, from FY 03-04 through FY 08-09. This spending grew from \$56,917,738,641 in FY 03-04 to \$68,316,210,524 in FY 08-09; this represents an approximate 20% change over this period.

It should be noted that these totals include debt service expenditures, which may cause the capital expenditures to be slightly overstated, due to accounting vagaries.

TABLE 1-37: Statewide Total Expenditures, Including Capital, FY 03-04 to FY 08-09

Fiscal Year	Total Expenditures (incl. Capital)
FY 03-04	\$56,917,738,641
FY 04-05	\$60,211,055,029
FY 05-06	\$62,867,193,688
FY 06-07	\$66,658,594,710
FY 07-08	\$69,455,117,972
FY 08-09	\$68,316,210,524

CHART 1-37: Statewide Total Expenditures, Including Capital, FY 03-04 to FY 08-09

Table 1-38 and Chart 1-38 show per student Total Expenditures, including Capital Expenditures, from FY 03-04 through FY 08-09. The table at the bottom of the facing page shows the savings and the number of teachers that could have been employed had these expenditures in FY 07-08 only increased as much as PCPI.

TABLE 1-38: Statewide Total Expenditures, Including Capital, per Student, FY 03-04 to FY 08-09

Fiscal Year	Total Expenditures (incl. Capital)
FY 03-04	\$9,799
FY 04-05	\$10,363
FY 05-06	\$11,028

CHART 1-39: % of Total Expenditures (excluding capital) spent “In the Classroom”, FY 03-04 to FY 08-09

(This page left intentionally blank)

SECTION 2: STATEWIDE SPECIAL EDUCATION DATA

Table 2-1 shows data about the Average Daily Attendance of special education children state wide, and the relative size of the special education population compared to the total ADA. Note that special education ADA only varied slightly over this period. Note also that the special education ADA as a percentage of the total ADA remained fairly constant at 3% between FY 03-04 and FY 08-09.

TABLE 2-1: Special Education ADA as a % of Total ADA, FY 03-04 to FY 08-09

Category	FY 03-04	FY 04-05	FY 05-06	FY 06-07	FY 07-08	FY 08-09
Total ADA	5,808,658	5,810,058	5,700,463	5,744,828	5,724,487	5,630,222
Special Education ADA	182,822	183,528	180,795	183,717	183,670	183,032
Special Education ADA as a % of Total ADA	3%	3%	3%	3%	3%	3%

Table 2-2 shows data about the various categories of the special education population statewide from FY2007-08 back through FY 2003-04. So, for example, the Mental Retardation enrollment was 43,113 in FY07/08, and that enrollment represented 6% of the total special education enrollment of 677,875 in FY07/08. The two largest special education categories in FY 07/08 were Speech or Language Impairment (176,256, or 26% of the total) and Specific Learning Disability (297,933, or 44% of the total). No other category registered more than 7% of the total Special Education enrollment in FY 07/08. Generally, the relative percentages of these Special Education categories stay fairly constant over this period from FY 03/04 through FY 07/08, with three notable exceptions. First, the Specific Learning Disability category declined substantially from 50% of the total Special Education enrollment in FY 03/04, to 44% of the total Special Education enrollment in FY07/08. The Other Health Impairment enrollment increased from 5% of the total Special Education enrollment in FY03/04 to 7% in FY07/08, while the Autism enrollment increased from 4% to 7% of the total Special Education enrollment over the same period.

TABLE 2-2: Special Education Enrollment, by Classification, FY 03-04 to FY 08-09

Special Education Classification	Fiscal Year											
	% of FY 08/09 Total		% of FY 07/08 Total		% of FY 06/07 Total		% of FY 05/06 Total		% of FY 04/05 Total		% of FY 03/04 Total

SECTION 3: SELECTED SCHOOL DISTRICT COMPARISONS

Table 3-1 shows total expenditures per student, excluding capital expenditures, for 52 selected school districts from FY 2003-04 through FY 2008-09. These 52 school districts are listed in descending rank order, according to their respective per student expenditures for FY 2008-09.

Of these 52 school districts, Los Angeles Unified had the highest per student expenditure of \$13,732 in FY 08-09, while Corona-Norco Unified had the lowest per student expenditure in FY 08-09, \$7,588, which was \$6,144 less per student than Los Angeles Unified.

Note that Table 3-1 continues on the next page.

TABLE 3-1: Select School Districts, Total Expenditures, Excluding Capital, per Student,
FY 03-04 to FY 08-09

District Name	FY 03-04	FY 04-05	FY 05-06	FY 06-07	FY 07-08	FY 08-09
Los Angeles Unified	\$10,159	\$10,763	\$12,476	\$12,076	\$13,309	\$13,732

Table 3-2 shows estimated teacher salaries and benefits as a percentage of total expenditures (excluding capital expenditures) from FY 2003-04 through FY 2008-09. These 52 school districts are listed in descending rank order, according to their respective percentage of total expenditures allocated to teacher salaries and benefits, for FY 2008-09.

Temecula Valley Unified estimated expenditures for teacher salaries and benefits were 62 percent of Total Expenditures in FY 08-09. Table 3-2 is continued on the next page, and shows that estimated expenditures for teachers salaries and benefits constituted only 41 percent of the total expenditures (excluding capital expenditures) of Los Angeles Unified School District.

Table 3-2 is continued on the facing page and shows estimated teacher salaries and benefits as a percentage of total expenditures (excluding capital expenditures) from FY 2003-04 through FY 2008-09. These 52 school districts are listed in descending rank order, according to their respective percentage in FY 2008-09.

Oakland Unified estimated teacher salaries and benefits expenditure was 35 percent of the Total Expenditures (excluding capital expenditures) in FY08-09.

Table 3-3 shows the percentage change in Total Expenditures per Student (excluding capital expenditures), between FY 03-04 and FY 08-09, compared to the percentage change in California Per Capita Personal Income (PCPI) for the same period. The 52 school districts are ranked in descending order, according to the percent differential between these two percentages.

So, for example, Compton Unified increased Total Expenditures (excluding capital expenditures) per student by 62 percent from FY03-04 through FY 08-09, while California PCPI increased 15 percent during this same period. The difference between the increase in Compton Unified Total Expenditures (62%) and California PCPI (15%) is 48 percent, which is shown in the right hand column.

As shown in the right hand column, 49 of these 52 school districts increased Total Expenditures (excluding capital expenditures) more rapidly than the increase in the California PCPI.

Table 3-3 is continued on the next page.

TABLE 3-3: Selected School Districts,
% Change in Total Exp. Per Student (excluding Capital) vs. % Change in PCPI
FY 03-04 to FY 08-09

District Name	% Change in Tot. Exp PS (excl. capital) FY 03-04 to FY 08-09	Change in PCPI (FY 03-04 to FY 08-09)	Difference

The continuation of Table 3-3 is shown on the facing page. As mentioned previously, in only three of these 52 districts did Total Expenditures increase less rapidly than California PCPI. Those three districts, as shown in the continuation of Table 3-3 opposite, are East Side Union High, Eureka City Unified, and Santa Ana Unified.

TABLE 3-3 (cont'd): Selected School Districts,

Table 3-4 shows the Total Certificated and Classified Supervisors & Administrators Salaries as a percentage of Certificated Teacher Salaries in each of the 52 selected districts in FY 08-09. The districts are ranked in descending order, according to this percentage in FY 08-09.

So, for example, in FY 08-09 the expenditure for Classified Supervisors and Administrators Salaries in Oakland Unified was equal to 24 percent of the amount that Oakland Unified expended for Certificated Teachers Salaries. By way of comparison, the Temecula Valley Unified expenditure for Classified Supervisors and Administrators Salaries was only equal to 8 percent of the amount that Temecula Valley Unified expended for Certificated Teacher Salaries in FY 08-09.

TABLE 3-4: Selected School Districts, Certificated & Classified Administrator Salaries as a % of Certificated Teacher Salaries, FY 08-09

(This page left intentionally blank)

SECTION 4: SELECTED 52 SCHOOL DISTRICT PROFILES

District Profile: Anaheim Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed.

As shown in the data on the facing page, Teacher Salaries as a % of Total Expenditures in Anaheim Union High has been decreasing between FY 03-04 and FY 08-09.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 209 additional teachers could have been hired in FY 08/09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 10.24% of Certificated Teacher Salary expenditures.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51.06%.

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Anaheim Union High

District Summary: FY 2008-09

County	Orange
Average Daily Attendance	31,311
Avg. Teacher Salary	\$80,736

Teacher Sal. & Ben. as a % of Total Operating Expenditure

District Profile: Bakersfield City Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed.

As shown in the data on the facing page, Teacher Salaries as a % of Total Expenditures in Bakersfield City Elementary has been decreasing between FY 03-04 and FY 08-09.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 70 additional teachers could have been hired in FY 08/09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13.07% of Certificated Teacher Salary expenditures.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 48.78%.

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Teacher Sal. & Ben. as a % of Total Operating Expenditure

District Profile: Conejo Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed.

As shown in the data on the facing page, Teacher Salaries as a % of Total Expenditures in Conejo Valley Unified has been decreasing between FY 03-04 and FY 08-09.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08/09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11.84% of Certificated Teacher Salary expenditures.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 53.41%.

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Teacher Sal. & Ben. as a % of Total Operating Expenditure

District Profile: Fresno Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed.

As shown in the data on the facing page, Teacher Salaries as a % of Total Expenditures in Fresno Unified has been decreasing between FY 03-04 and FY 08-09.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08/09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18.50% of Certificated Teacher Salary expenditures.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 47.91%.

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Teacher Sal. & Ben. as a % of Total Operating Expenditure

District Profile: Lucia Mar Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed.

As shown in the data on the facing page, Teacher Salaries as a % of Total Expenditures in Lucia Mar Unified has been decreasing between FY 03-04 and FY 08-09.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08/09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12.68% of Certificated Teacher Salary expenditures.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63.09%.

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed.

As shown in the data on the facing page, Teacher Salaries as a % of Total Expenditures in Pasadena Unified has been increasing between FY 03-04 and FY 08-09.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08/09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13.62% of Certificated Teacher Salary expenditures.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 52.85%.

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Teacher Sal. & Ben. as a % of Total Operating Expenditure

District Profile: San Diego City Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed.

As shown in the data on the facing page, Teacher Salaries as a % of Total Expenditures in San Diego City Unified has been increasing between FY 03-04 and FY 08-09.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08/09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13.09% of Certificated Teacher Salary expenditures.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55.59%.

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Teacher Sal. & Ben. as a % of Total Operating Expenditure

District Profile: Shasta Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed.

As shown in the data on the facing page, Teacher Salaries as a % of Total Expenditures in Shasta Union High has been decreasing between FY 03-04 and FY 08-09.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 70 additional teachers could have been hired in FY 08/09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14.81% of Certificated Teacher Salary expenditures.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 53.50%.

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)
